

HALO+

The most advanced, compact life raft in the world just got better.

The Superior Life-Saving Equipment HALO+ is the next generation of ultra-light, ultra-compact life rafts offered in today's boating market. The HALO+ includes an automatically deployed canopy with no need to manually or orally inflate like other rafts on the market. The canopy can also be removed and reapplied if needed. The HALO and HALO+ are still the only vacuum sealed rafts in their class, allowing for 3 year service intervals in line with the rest of Superior Life-Saving Equipment's lineup. Each HALO+ comes standard with automatic canopy and light, insulated floor and offshore ballast system to provide safety and additional stability on the water. HALO life rafts are ultrasonically welded, giving you a much more durable and long lasting product compared to hand glued rafts from our competition.

- Vacuum sealed for added protection and extended 3 year service intervals
- Automatically deployed canopy
- Canopy light
- Ultrasonic welded seams
- Removable Insulated floor
- Superior green hull for added visibility on the water
- 4* oversized weighted ballast bags
- Automatically deployed 4 rung boarding ladder
- Stainless steel tow ring and hardware throughout
- 6 Year Warranty
